

BRIGHT TV

Viewership analysis

Gladys Seisa

AGENDA

- 1. Introduction
- 2. Insights
- 3. Recommendations
- 4. Q&A

Introduction

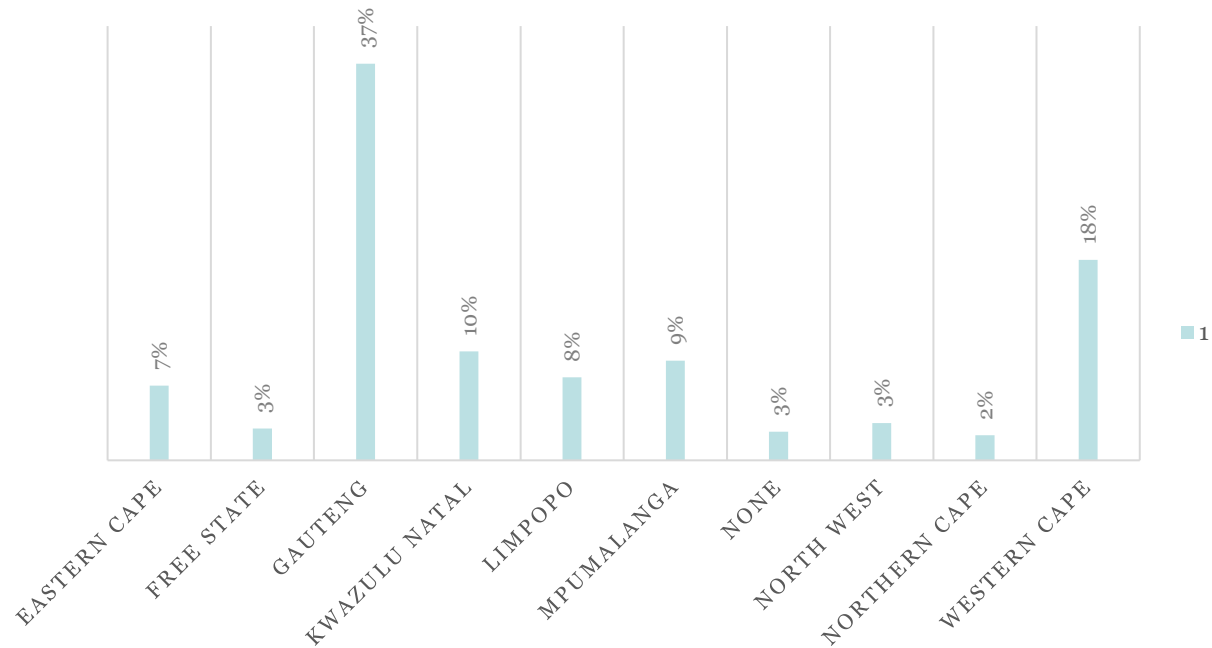

We have analyzed the viewership data across channels, time and demographics to better understand the user's behavior and trends in detail. By separating viewers and identifying peak engagement patterns such as best performing show sitting at 17% overall performance.

Generally, the viewer preference at just over 80% watch time per day of day is short form content across all provinces, with Gauteng sitting at 37% viewership followed by Western Cape at 18%.

The action plan includes demographic and regional content focus.

Regional Performance

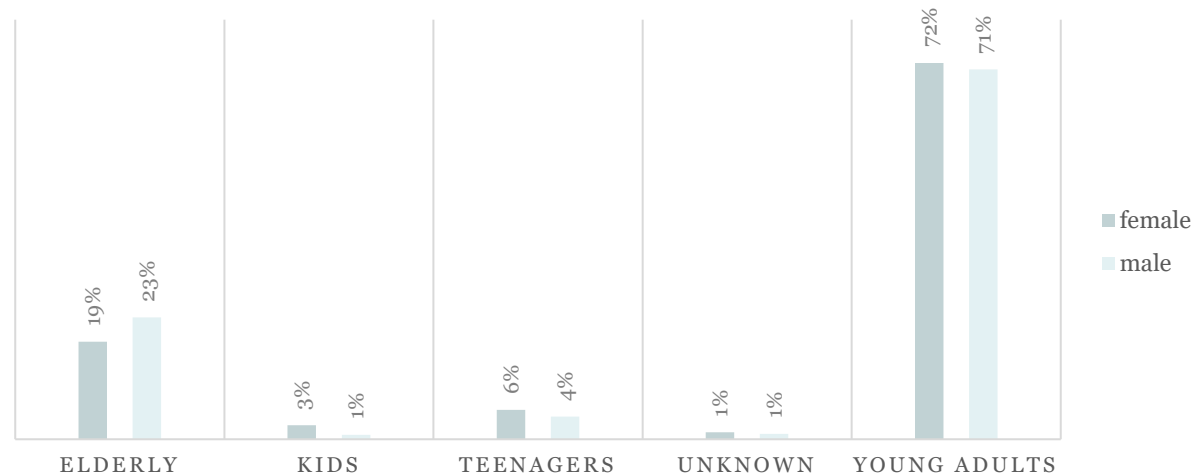

TOTAL USERS BY PROVINCE

There's a clear and strong viewership performance at 37% for Gauteng followed by Western Cape at 18% of total users.

Age group demographics

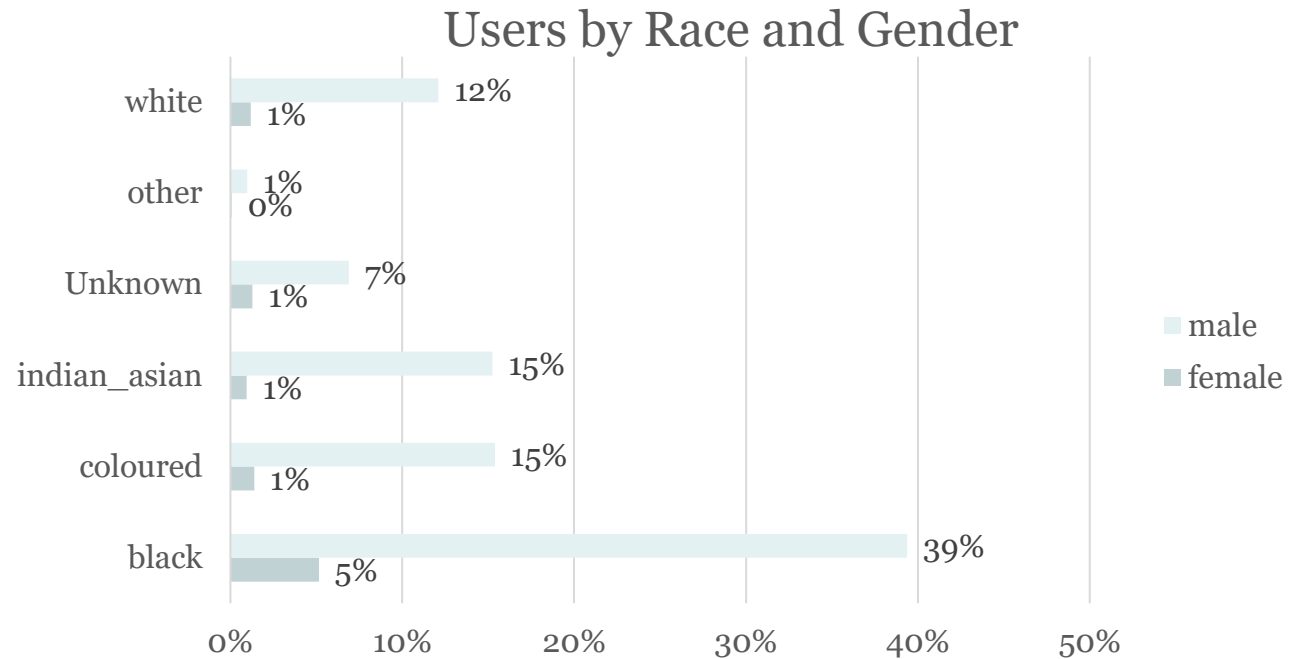

USERS BY AGE GROUP AND GENDER

Young adults between the ages of 20-39 have clear dominance of viewing time with average of 70% across all genders.

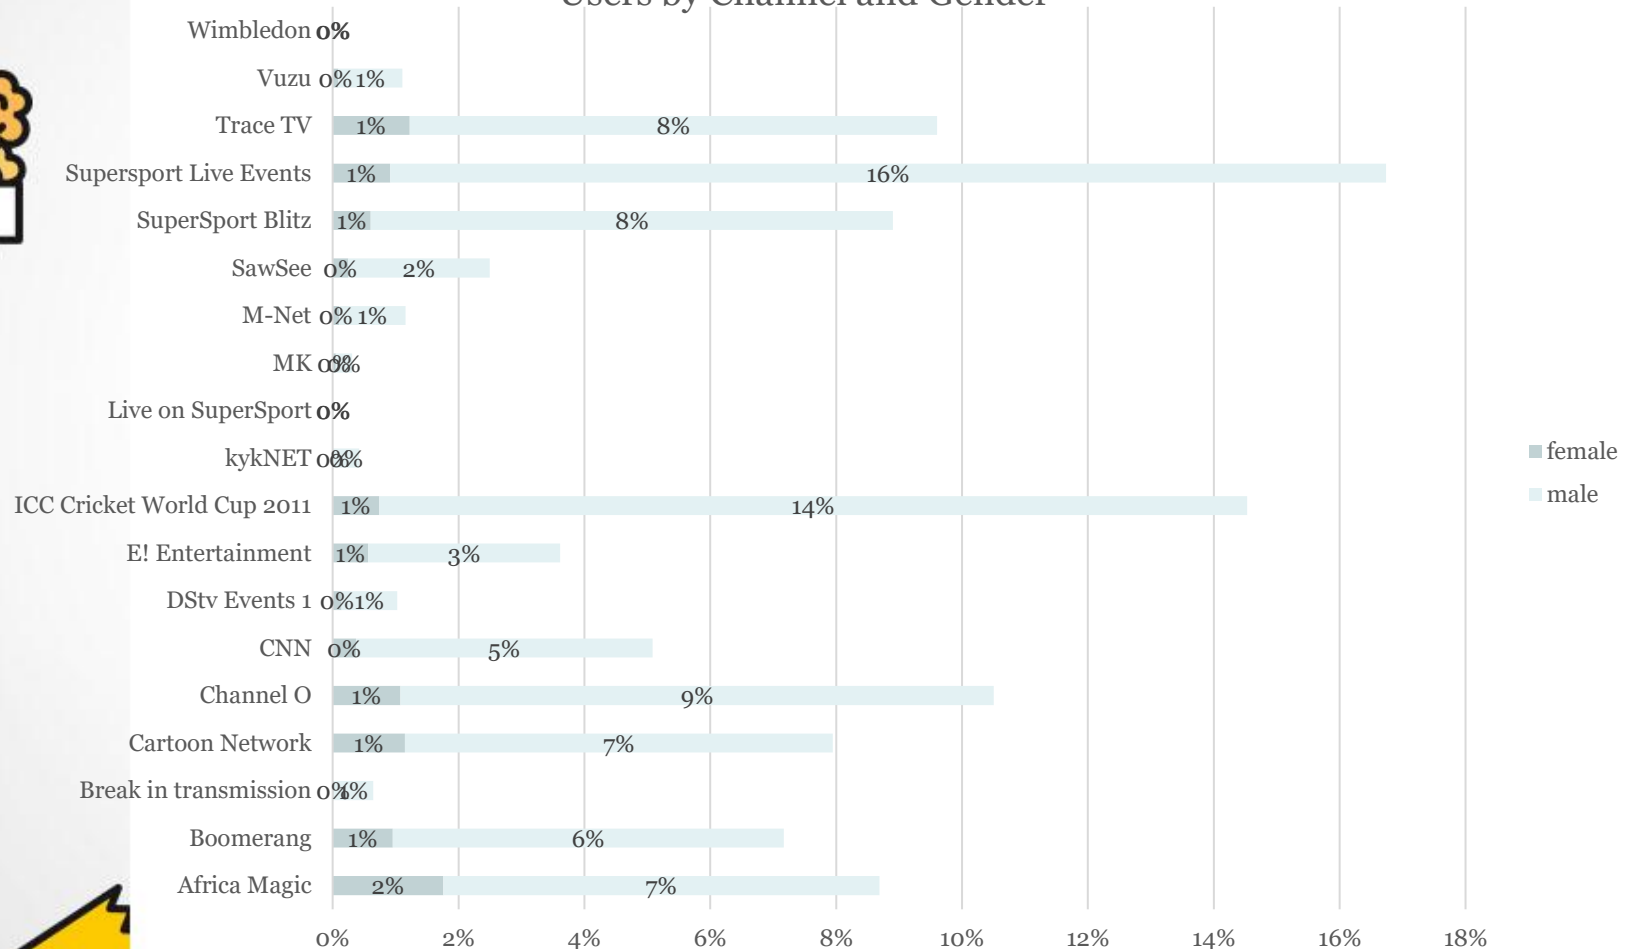

User Grouping

Black customers dominate, being boosted by black males at 39%, and with a 45% shared performance with black females at 5%.

Channel Performance

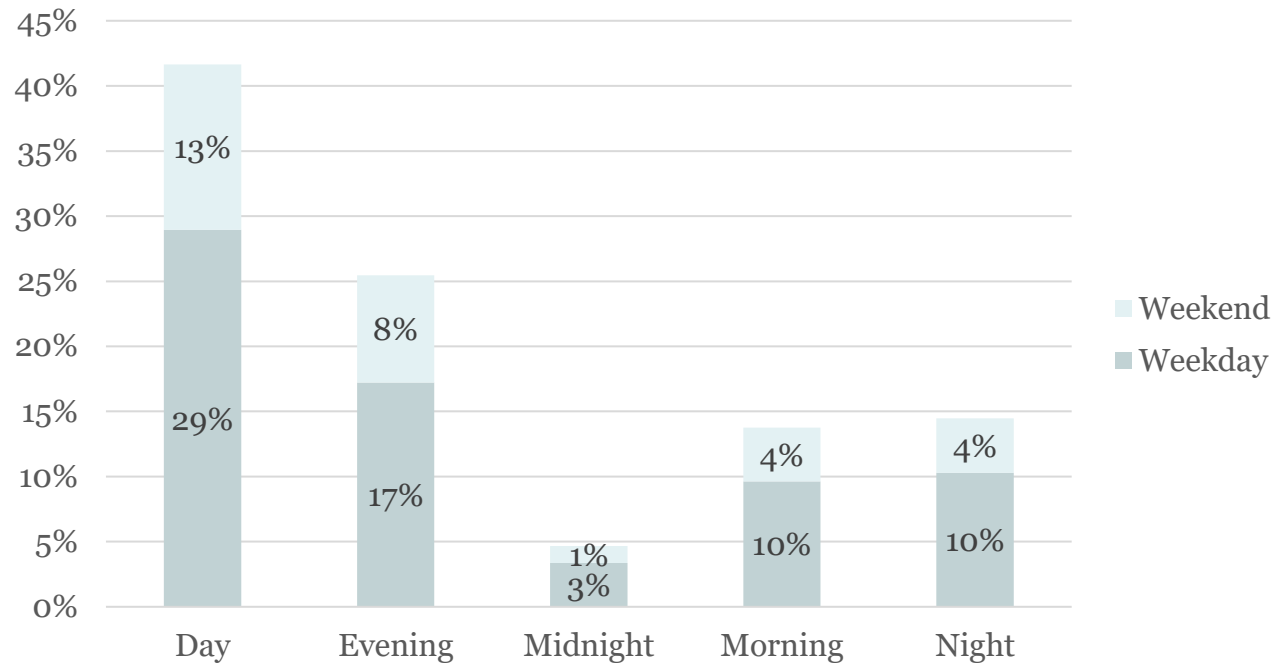

Users by Channel and Gender

SuperSport Live Events is a viewer's favorite, being led by males at 16% and shared average of 17% with females.

Engagement times

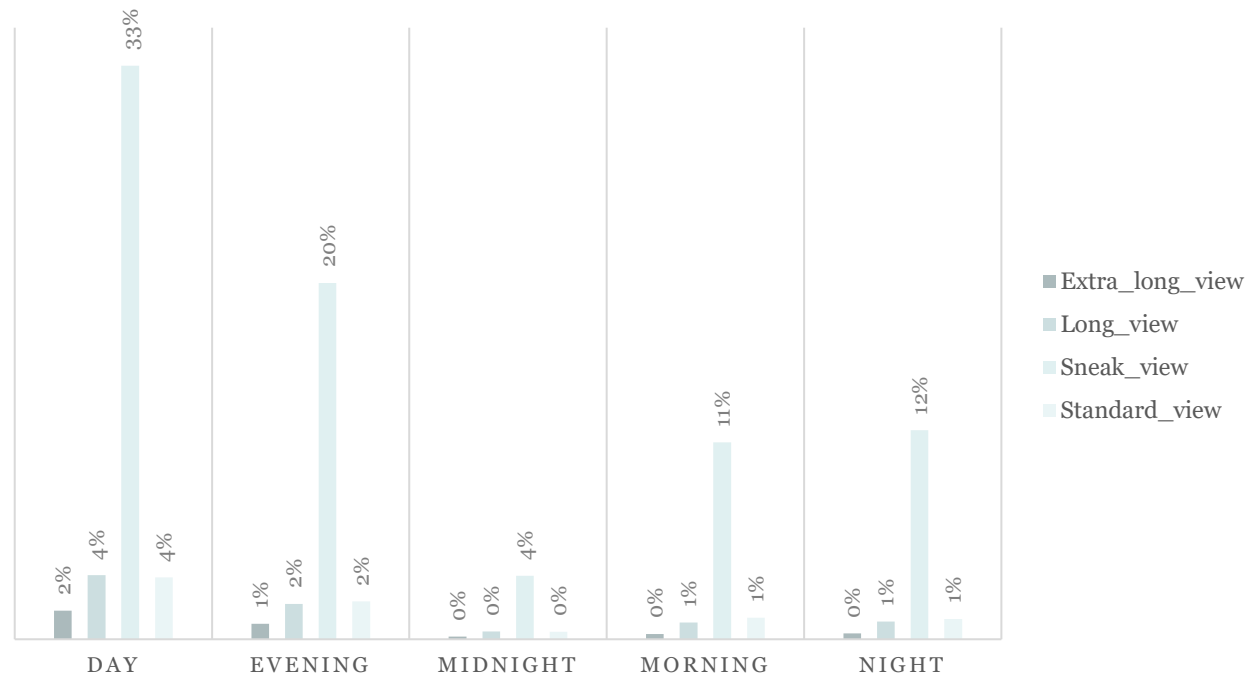

users by time of day and weekday

Afternoon (Day) engagement is at an average of 45% with the most engagement during the weekend at 29%.

Engagement times

USERS BY TIME OF DAY AND DURATION

Short content (Sneak view) is a preferred type of content in the afternoon (Day) engagement at 33% and followed by evenings with 20% with average of 80% total duration.

Recommendations

- **Marketing:** Focus on targeted marketing, strategically move some of the least watched programs to days and times with most viewers.
- **User preference:** Users have a clear preference on what they watch, short content is just over 50% for most channels and across all demographics. This should be a driving force for the Bright TV station, creating shorter content to cover the least performing days and times.
- **Channel maximization:** There's a clear dominance of sport content from males, and not so much for females, more exposure for shows like Africa Magic to attract female audience.

Recommendations

- **Peak times :** Increase on the visibility of the least watched shows by creating catchy advertisements and recaps during most watched programs to attract and retain viewers.
- **Demographic and Regional focus:** Take advantage of strong culture and lifestyle of different demographics and create content around that, people watch what they relate to.

Open for Q&A.

THANK YOU.
